EDUCATION

Dayananda Sagar College of Engineering 2023 – 2027
B.E in Artificial Intelligence and Machine Learning CGPA: 9

EXPERIENCE

AI Engineer Intern July 2025 – Oct 2025
Fraction Labs Remote

- Worked on AI automation pipelines and **LangChain-based RAG workflows** for document intelligence.
- Engineered **Voice AI Call Centre System** leveraging speech-to-text, LLM reasoning, and dynamic intent routing — improving response handling efficiency by 60%.
- Developed multi-agent frameworks for autonomous lead qualification and context tracking.
- Integrated vector databases with retrieval pipelines to enhance context recall and query accuracy.
- Contributed to **LLM fine-tuning, prompt optimization, and evaluation of conversational agents.**

Full Stack Mentor Jan 2025 – May 2025
Spawn Labs Harihara, Karnataka

- Mentored and trained 70+ diploma students in **full-stack web development and ML integration.**
- Guided students through projects covering **HTML, CSS, React, Node.js, and API integration.**
- Led project reviews and helped build deployable prototypes aligned with industry practices.

RESEARCH

The Cognitive Impact of AI Dependability: Unnoticed Behavioural Shifts Leading to ADHD-Like Symptoms
Presented at ADCIS 2025 (Co-authored with Jaya Siddhartha, Prof. K.G. Nagarathnamma, and Prof. Shankararama Sharma)

- Investigated cognitive effects of **long-term AI reliance** and its correlation with attentional fatigue.
- **Accepted among top 109 out of 858 international submissions at ADCIS 2025.**

PERSONAL PROJECTS

KnowBaseRAG *LangChain, FastAPI, ChromaDB, Streamlit – GitHub*
Web-based research assistant using Retrieval-Augmented Generation.

- Designed and deployed an end-to-end **Retrieval-Augmented Generation (RAG)** system for source-grounded question answering over web-ingested knowledge.
- Implemented document ingestion, chunking, embedding generation, and semantic retrieval using a vector database.
- Built a Streamlit interface for interactive querying with FastAPI backend orchestration.

Next-Hire *Selenium, Spacy, Streamlit – GitHub*
Automated job recommendation system using NLP and live web scraping.

- Parsed resumes to extract skills and matched job listings using NLP-based similarity scoring.
- Automated live job scraping and visualized relevant opportunities through an interactive dashboard.

Cold Email Craft *LangChain, ChromaDB, Streamlit – GitHub*
AI-driven system for personalized email generation with tone control.

- Generated context-aware emails using prompt-tuned LLM chains and retrieval-augmented context.
- Reduced manual drafting effort by over 70 percent through automated personalization.

LOCOFY *MERN Stack, Flask, FastAPI – GitHub*
AI-assisted travel planning platform for real-time itinerary generation.

- Integrated multiple APIs to generate optimized travel plans based on location and preferences.

TECHNICAL SKILLS AND INTERESTS

Core AI and ML: Python, Machine Learning, NLP, Retrieval-Augmented Generation, Embeddings, Vector Databases
Frameworks and Libraries: LangChain, LlamaIndex, PyTorch, TensorFlow, scikit-learn, Spacy
Backend and Systems: FastAPI, Flask, REST APIs, MERN Stack
Databases: ChromaDB, MongoDB, MySQL
Tools: Git, GitHub, VS Code, Jupyter Notebook, Power BI, Tableau
Interests: Applied AI Systems, Generative AI, LLM Integration, Voice AI Systems

ACHIEVEMENTS

- 2nd Place – Ideathon by Numerano Club, DSCE.
- 2nd Place – Hacktopus 25 Hackathon, AMC College of Engineering.
- Volunteer – Youth for Parivarthan; recognized for leadership and community contribution.
